PROFESSIONAL SUMMARY

Full Stack Developer with nearly 4 years of experience building enterprise web applications, REST APIs, workflow systems, and cloud-based solutions. Hands-on experience with TypeScript, React, Angular, Node.js, NestJS, PostgreSQL, and AWS, including Kubernetes/EKS deployments, production database migrations, and enterprise platforms such as Alfresco, Keycloak, and Activiti/APS. Practical experience integrating AI capabilities — RAG, LLM APIs, semantic search, and AI agents — into business applications.

WORK EXPERIENCE

Full Stack Web Developer

Proficient Enterprises

August 2025 – Present · Cheyenne, Wyoming, USA · Remote

- Developed internal portals and dashboards with React and TypeScript, and built REST APIs in Node.js/NestJS and Python to integrate Alfresco, Activiti, Keycloak, and AWS services.
- Designed custom content models, Web Scripts, and multi-strategy search (Lucene, CMIS, FTS) in Alfresco Content Services to support enterprise document management requirements.
- Built BPM solutions on Activiti/APS, including business process design, task forms, approval automation, and process variable management for enterprise workflows.
- Diagnosed and resolved a critical ACT_EVT_LOG growth incident (7GB+), tuning Spring Batch jobs and HikariCP pool configuration to restore production database performance.
- Implemented identity management with Keycloak, integrating LDAP federation, OAuth2/JWT flows, custom login themes, and cross-service SSO.
- Managed AWS infrastructure (S3, EC2, EKS with Kubernetes and Helm, OpenSearch) and optimized Aurora RDS queries for enterprise workloads.
- Led production migrations from MySQL to PostgreSQL and from Docker Compose to Kubernetes.
- Designed AI agents and RAG pipelines with LangChain and LangGraph, using OpenAI embeddings and pgvector for semantic search, and orchestrated automation workflows with n8n.

Full Stack Web Developer

ConoSurIT

October 2022 – August 2025 · Córdoba, Argentina · Remote

- Developed and maintained enterprise web applications for document management and workflow automation using Angular, Node.js, and PostgreSQL.
- Improved application performance by ~40% by refactoring component architecture and introducing lazy loading strategies.
- Migrated a monolithic backend to a microservices architecture, increasing system modularity and scalability.
- Built REST APIs and integrated Alfresco CMIS for document storage and retrieval workflows.
- Acted as technical reference for the development team, coordinating tasks and reviewing implementation decisions during sprints.

EDUCATION

National University of Patagonia (UNPSJB)

2015 – 2019

Bachelor's Degree in Software Development Analysis · Completed

TECHNICAL SKILLS

Frontend: TypeScript, React, Next.js, Angular

Backend: Node.js, NestJS, Express.js, REST APIs, Python

Databases: PostgreSQL, MongoDB, Aurora RDS, pgvector, OpenSearch

Cloud & DevOps: AWS, EKS, Kubernetes, Docker, Helm, CI/CD, GitHub Actions, Linux

Enterprise: Alfresco, Keycloak, Activiti/APS

AI & Automation: OpenAI API, RAG, LangChain, LangGraph, AI Agents, n8n

LANGUAGES

Spanish — Native · English — Intermediate (B1)
